We are Now Offering to the Public

1910 Model of E. M. F. Studebaker Cars

WE have just received several car loads and can make deliveries at once. This is the best proposition that we have ever offered; a nice roomy five-passenger, four cylinder car, equipped with Magneto and full set of Lights for \$1300.00. These cars are now coming through with a finish that cannot be beat in any car, no matter what you pay. They have abundance of power, are substantially built on well-tried principles. There are now several thousand of them in use, all of which have given the best of satisfaction. Ask any man that knows anything about an automobile and he will tell you that it is the best for the money. The E. M. F. will run over 20 miles on a gallon of gasoline, weighs only 2100 pounds, has good long wheel base of 106 inches, making it easy riding. Call at the Great Bend Auto Company for a demonstration.

We also carry in stock several other lines. We have several second hand cars which we will sell at once at a very low figure. Can fit you out with either a small Runabout or a good 5-passenger Touring Car.

Great Bend Auto Co.
